IRVING RIVERA

Lead Software Engineer | Java & Full Stack | Legacy Modernization | AI-Assisted Development

irvingrivera.com (contact form) | Carrollton, TX

PROFESSIONAL SUMMARY

Lead Software Engineer with 10+ years building financial and insurance applications, primarily in C#/.NET and more recently Java Spring Boot, with React and Node.js on the front end. At Allstate I lead a payments engineering team hands-on: modernizing legacy VB.NET systems to Spring Boot, running root-cause analysis on production issues, and leading AI adoption across engineering. I grow engineers through design reviews and day-to-day technical guidance.

TECHNICAL SKILLS

Languages & frameworks: Java / Spring Boot, C# / .NET / VB.NET, JavaScript, React, Next.js, Node.js / Express, HTML / CSS, AngularJS.

Data: Oracle, SQL Server, PostgreSQL, MongoDB, Prisma, Kafka, ADX / KQL, Power BI.

Quality & delivery: unit and integration testing (Microsoft Fakes/Shims, Vitest), CI/CD (Jenkins, GitHub, Octopus Deploy, Harness), Git, Splunk, Datadog, root-cause analysis.

Security & cloud: OAuth/OIDC and token-based auth (Clerk, Google OIDC), role-based permissions, least-privilege database roles, AWS, GCP, Railway.

AI-assisted engineering: AI adoption across engineering teams, LLM API integration (Claude, OpenAI), agentic coding workflows, AI-assisted code review and testing.

PROFESSIONAL EXPERIENCE

Allstate Irving, TX **2020 – Present**

Managing Software Engineer — Claims Technology Services

- Modernization: lead the move of legacy VB.NET claims systems to Java Spring Boot, turning requirements into technical designs, effort estimates, and delivery plans.
- Distributed systems: engineer Kafka consumers and Saga-based workflows so multi-step claims payment transactions use compensating steps on failure; build duplicate payment prevention and audit controls.
- Debugging & root cause: lead investigations of production incidents and payment failures and drive permanent fixes, including a VB.NET timer overflow and an Oracle query failure caused by DISTINCT on CLOB columns.
- Observability: moved payment KPI monitoring from Splunk to Fabric and Power BI by consolidating 21 Splunk searches into KQL and DAX with 4-week rolling thresholds; evaluated Datadog RUM vs. APM and chose APM.
- AI adoption: lead AI adoption across the engineering team, introducing AI tools for code generation, code review, and testing.
- Growing engineers: mentor developers through design reviews and technical discussions, and handle performance management, calibration, and goal setting.

Discover Technologies Herndon, VA **2019 – 2020**

Senior Software Engineer / Consultant

- ServiceNow Platform: architected and developed DocIntegrator, a custom scoped app for document workflow automation, including custom widgets, REST integrations, and role-based permissions.
- Modernized legacy Python frameworks to React and Java Spring Boot for federal agency clients (FDA); built a SharePoint intranet dashboard used by 20,000+ federal employees (SPFX, Power Apps).

Premier Trailer Leasing Plano, TX **2018 – 2019**

Senior Software Engineer — built a multi-tiered .NET/C# framework separating data layers for horizontal scalability on customer-facing apps, and integrated Google APIs for real-time CRUD operations.

State Farm Dallas, TX **2014 – 2018**

Full Stack .NET Developer — managed full SDLC for insurance applications, migrating on-prem IIS services to AWS and maintaining SSIS packages and SQL Server databases for data integrity.

FEATURED AI PROJECT

AI Job Agent | job-agent-production-76b5.up.railway.app

- Built and deployed a full-stack app that finds, vets, and tailors job applications: React/Vite front end, Node.js/Express API, PostgreSQL via Prisma, Clerk auth, Stripe billing, and the Claude API.
- Kept AI decisions in check with code: hard scoring caps, company website verification, per-user cost limits, and human approval gates; backend covered by a Vitest test suite.

EDUCATION

Bachelor of Business Administration — Computer Information Systems & Management

University of Texas at El Paso
